

# BLUE Badge

 Your Local Case Management System

## Cost Calculator breakdown

This info-sheet is to be used in conjunction with IEG4's Blue Badge cost Calculator. The following information will explain how we calculated your estimated "Potential Saving" field in the cost calculator form.

The data return by the form uses council census 2016 population data; followed by an example set of figures based on Blue Badge applicants Gov.uk & local government 2016 open data release.

On average 54% of National Blue Badge applications required a further assessment

Using Leeds council open data, we surmised that a further 50% of the further assessments, required discretionary information

Local **Discretionary** decisions are based on 50% of further assessment applications.

## 1. Calculation

2016 Census Population data  
multiplied by 54% = Further Assessments

Further Assessments  
multiplied by 50% = Local **Discretionary** Decisions

## 2. Calculation

Printing costs

1 \* **Discretionary**

Scanning costs

$25,000 / (210 * 7 * 60) * 3 * \text{Discretionary}$

Write out costs

$25,000 / (210 * 7 * 60) * 10 * 40% * \text{Discretionary}$

Staff time to rekey & verify

$25,000 / (210 * 7 * 60) * 60 * \text{Discretionary}$

- Average salary £25,000
- Printing is based on costing £1 per print
- Time to scan the form is 3 mins
- The time to write out to applicants for required information is 10 mins
- The percentage of paper forms where a write out is needed is 40%
- The average time for staff to chase evidence, rekey, and verify is 60 mins
